PRANAV KALRA

Toronto, ON M5J 0E1 | (647) 896-3910 | email@pranavkalra.ca | linkedin.com/in/pranav00100 | pranavkalra.ca

SUMMARY

Software developer with 4+ years of experience and a recent Master of Management in Analytics (McGill University), with a record of turning requirements into working tools and keeping stakeholders informed. Builds in Python and uses AI tools such as Claude Code to deliver faster. Experienced in Agile/Scrum teams using JIRA, and in presenting progress and demos directly to clients.

CORE STRENGTHS

Programming & Automation: Python, SQL, FastAPI, REST APIs, JavaScript, TypeScript, automated data quality tests

AI-Assisted Delivery: Claude Code and agentic AI-assisted workflows, LLM agents with tool calling (OpenAI Agents SDK)

Project Delivery: SDLC, Agile/Scrum, JIRA, requirements gathering, stakeholder communication, client demos and presentations, Git

PROFESSIONAL EXPERIENCE

Data Analytics Graduate Consultant, Capstone Project – Club Piscine *Toronto, ON (Remote) | 09/2025 – 06/2026*

- Owned a forecasting feature end to end, from requirements and API design (Python, FastAPI) to deployment, replacing manual CSV exports with a direct feed into Power BI.
- Measured the impact: cut weighted MAPE from 20.8% to 18.6% and reduced high-error groups from 166 to 38, validated with walk-forward testing.
- Automated data quality tests, validated results with walk-forward testing, and used agentic AI-assisted workflows to speed up code generation; presented demos directly to client stakeholders.

Independent Property Portfolio Manager – Self-Employed *Toronto, ON | 02/2022 – Present*

- Run a rental property business independently, using market trend analysis to optimize pricing and improve listing visibility.

Software Developer – Xpressphone *Toronto, ON | 03/2020 – 04/2022*

- Built the frontend of the company website in ReactJS and helped deploy it.

Frontend Developer – Tata Consultancy Services *Toronto, ON | 10/2018 – 11/2021*

- Built secure financial web and mobile applications with ReactJS and TypeScript, including reusable components and responsive, accessible UI, in Agile/Scrum teams using JIRA.
- Improved UI rendering and load performance through efficient state management and profiling, and partnered with backend teams on API integrations.

PROJECTS

- Personal portfolio (pranavkalra.ca): built and maintain a React/MUI site with animated work history, project pages, and a contact form.
- ModoMubi: built a React movie discovery web app focused on clean UI and fast search.
- Multi-agent customer service system (McGill): built LLM support and operations agents with the OpenAI Agents SDK and debugged tool-calling failures.

EDUCATION

Master of Management in Analytics (MMA) – McGill University *01/2025 – 09/2026*

- Awarded a $10,000 Entrance Scholarship. Coursework: Building Agentic AI Systems, Time Series Forecasting.

Bachelor of Electrical Engineering – Toronto Metropolitan University *09/2013 – 08/2017*
