PRANAV KALRA

Toronto, ON M5J 0E1 | (647) 896-3910 | email@pranavkalra.ca | linkedin.com/in/pranav00100 | pranavkalra.ca

SUMMARY

Analytics and software professional and recent MMA graduate with 3+ years of enterprise and startup experience building secure financial web and mobile applications, backed by a Bachelor of Electrical Engineering. Experienced across the software development lifecycle (SDLC): translating business requirements into technical specifications, developing and testing code, integrating REST APIs, troubleshooting, version control and technical documentation.

TECHNICAL SKILLS

Programming & Frameworks: Python, TypeScript, JavaScript, SQL, ReactJS, React Native, HTML5/CSS3
APIs & Integration: RESTful APIs, JSON, application integration, Netlify deployment, AWS cloud fundamentals (course in progress)
Engineering Practices: Software Development Lifecycle (SDLC), Agile/Scrum (JIRA), Git Version Control, Quality Assurance & Testing, Data Quality Testing, Debugging & Troubleshooting, Technical Documentation
Data & Analytics: Pandas, LightGBM, PyTorch, Power BI, OpenAI Agents SDK

PROFESSIONAL EXPERIENCE

Data Science Consultant (MMA Capstone) – *Club Piscine* *Toronto, ON (Remote) | 09/2025 – 06/2026*

- Gathered business requirements from retail stakeholders and translated them into a working forecasting system built in Python and SQL across 27 stores and 11 product divisions.
- Built and iterated the forecasting models in Python and LightGBM, integrated third-party weather data as model features, and collaborated with teammates who delivered the forecasts to Power BI through a FastAPI service.
- Evaluated third-party data sources and modeling approaches for fit with the client's existing data ecosystem, weighing impact on data quality, reliability, and downstream reporting.
- Built automated data quality checks to catch bad or missing data, diagnosed and troubleshot model issues across iterations, used Git version control, and wrote documentation so the client could run the system.

Software Developer – *Tata Consultancy Services* *Toronto, ON | 09/2018 – 11/2021*

- Engineered secure enterprise banking mobile and web applications for BMO using React Native, ReactJS, and TypeScript, building reusable UI components and adhering to strict financial security protocols, WCAG accessibility, and responsive design.
- Collaborated across functional teams in a Scrum environment to integrate RESTful APIs with backend services, using profiling tools to optimize UI rendering and load performance across releases.

Software Developer (Part-Time, Early-Stage Startup) - Xpressphone *Toronto, ON | 03/2020 – 04/2022*

- Joined an early-stage Toronto startup that simplifies cell phone plan comparisons, translating user requirements into technical specifications and building the frontend of the company website in ReactJS.
- Tested, debugged and troubleshot front-end issues and helped deploy the site, using Git version control throughout the software development lifecycle.

Independent Property Portfolio Manager - Self-Employed *Toronto, ON | 02/2022 – Present*

- Run a short-term rental business independently, using market trend analysis to optimize pricing and listing visibility.

TECHNICAL PROJECTS

- **Multi-Agent Customer Service System (McGill University):** Built LLM-powered support and operations agents with the OpenAI Agents SDK and resolved tool-calling failures that caused escalations to stall.
- **ModoMubi Discovery App (https://modomubi.netlify.app):** Developed a responsive movie and TV discovery web application in ReactJS integrated with live third-party REST APIs, featuring asynchronous state management.
- **Personal Portfolio (https://pranavkalra.ca):** Designed and deployed a responsive personal developer portfolio using ReactJS/Material UI with continuous deployment via Netlify.

EDUCATION

Master of Management in Analytics (MMA) | McGill University, Desautels Faculty of Management *01/2025 – 09/2026*

Bachelor of Electrical Engineering | Toronto Metropolitan University (formerly Ryerson University) *09/2013 – 08/2017*
